

MODULAR RACKS POWER STRIP (PDU)

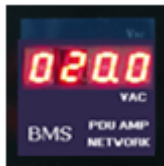

RACKING SYSTEM SOLUTION

THERMOSTAT

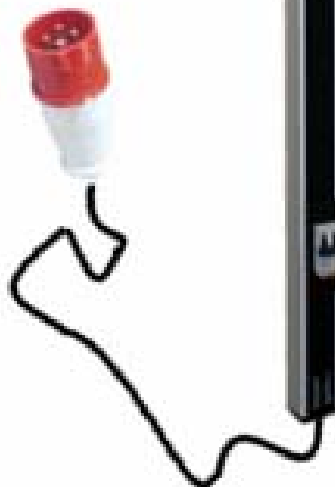

**AMP & VOLT
METER**

**NETWORKING
AMP METER**

DP MCB

Modular PDU

The modular PDU is a special designed for Racking System and meet with Industries Standard. The PDU designed with module of IEC C13, C19, 13 Amp Socket, Programmable Thermostat Controller, Amp & Volt Meter, Networking Amp Meter and it is fixed With Aluminum Shell and Protected by Double MCB

Programmable Thermostat Controller

The Programmable Thermostat Module is designed to monitor the Rack Temperature, The Programmable Thermostat Controller Pre-Loaded programmed to automatically reduces heating, the pre-loaded programmed comes with 3 levels of Controls Setting (Fan On/Off, Temperature warning Threshold and Temperature Alarm Threshold) and it can be set at local Key Pad

Amp & Volt Meter

The Amp & Volt Meter Module with local LCD Display is designed to monitoring of voltage and Total Power Consumption connected to PDU

Networking Amp Meter

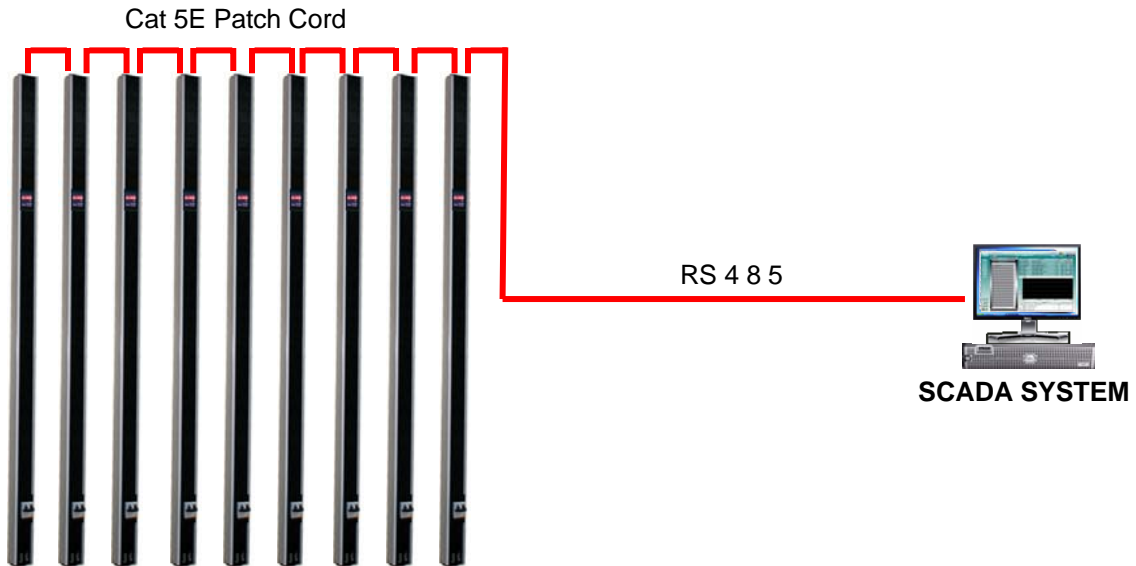

The Networking Meter has been designed as a simple field-replaceable component, this helps to eliminate maintenance downtime and is provided simple RS485 Open Network Protocol for Remote Monitoring system or Addition of PDU Web Server, The Web Server can connect up all Networking PDU and provides TCP/IP connection to Remote Web Access System, SCADA System and Alarm Threshold SNMP and Email Notification

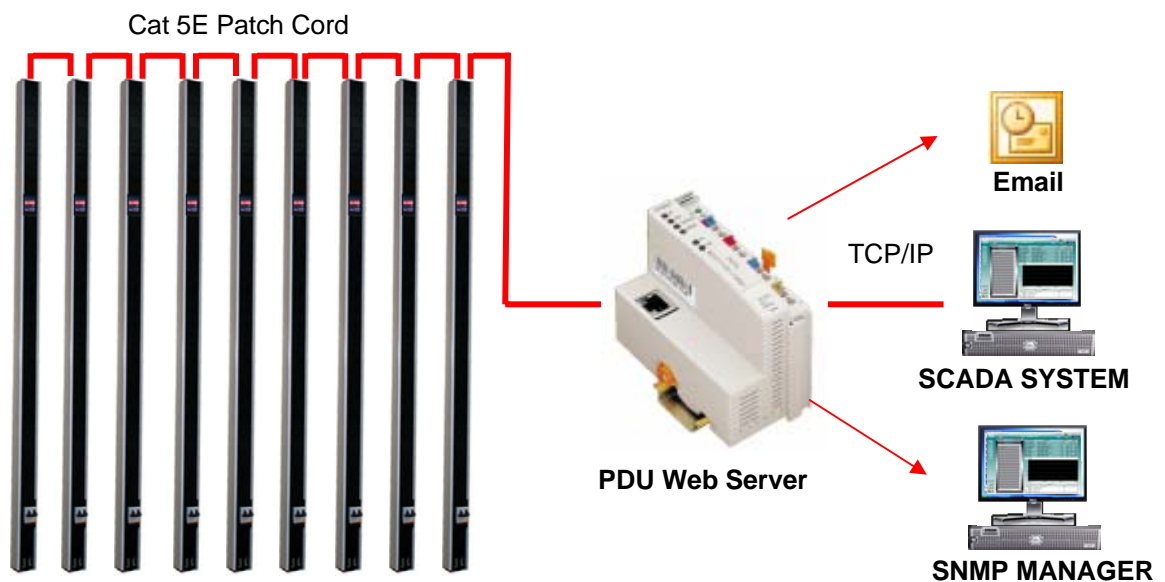

MODULAR RACKS POWER STRIP (PDU)

RACKING SYSTEM SOLUTION

Networking Amp Meter –RS485 Connection To SCADA System

Networking Amp Meter –PDU Web Sever
