

3L-LS is the sensing cable used to detect water and slightly corrosive and conductive liquids

“We won't have the society if we destroy the environment”

### Characteristics & Performance of Elsa sensing cable 3L-LS

- Application : Water and slightly corrosive conductive liquids
- Diameter size : 6.3mm average
- Continuity wires : White & Red insulated with flame-retardant polymer
- Sensing wires : 2 x Black wires, semi-conductive polymer
- Carrier : Flame-retardant polymer material with greenish colour in high visibility
- Fire resistance : Non-flame propagating and self-extinguishing
